

Acronis True Image 2021

	Acronis True Image	Online Sharing Services DropBox, iCloud, Google Drive, OneDrive.	Online Backup Services BackBlaze, Carbonite, iDrive, SOS Online Backup	Local Backup Tools Macrium, Paragon, Genie, Nova, Easeus.	Antivirus Software Bitdefender, McAfee, Kaspersky, Windows Defender.
Main Purpose	Unified backup and antimalware with local and cloud protections for all data, applications, and systems. Cloud storage includes anywhere access.	File sync across multiple devices. Store files online to be accessible from anywhere.	Cloud-based file backup for personal computers.	Local file and disk backup for personal computers.	Antivirus protection for personal computers and mobile devices.
Key Function	Backups and restores all data, including full computer backup (OS, programs, settings, and files), and stops all modern cyberattacks (malware, viruses, ransomware, cryptojackers). Supports local, external and network drives, and the cloud.	Copy and sync. Files deleted on one device will be deleted from all devices. Only files and folders can be stored.	File backup to and recovery from cloud.	File and disk backup to local external devices and NAS.	Virus scans and real time anti-malware protection.
Mirror Imaging / Full Image Backup	Core feature — invented and patented by Acronis. Supports Windows and Mac. Both local and cloud full image backup.	Not applicable	Only in selected offerings, mostly optional.	Local backup only, no Mac support.	Not supported
File and Folder Backup	Windows and Mac. Both local and cloud file backup is supported.	Not applicable	Backup to cloud.	Local backup only, no Mac support.	Not supported
Disk Cloning	Creates an exact replica of a Windows or Mac system disk, even if the system is in use.	Not applicable	Only in selected offerings, and those only support Windows.	Only in selected offerings, none of which support both Windows and Mac.	Not supported
Cloud Storage	Integrated into subscription licenses. Users can select their data center's location.	Cloud storage for online sharing. No data center selection.	Cloud storage for backup. No data center selection.	Not supported	Not supported

	Acronis	Online Sharing Services DropBox, iCloud, Google Drive, OneDrive.	Online Backup Services BackBlaze, Carbonite, iDrive, SOS Online Backup	Local Backup Tools Macrium, Paragon, Genie, Nova, Easeus.	Antivirus Software Bitdefender, McAfee, Kaspersky, Windows Defender.
Antiransomware and Cryptojacking Protection	Integrated into all editions. Detects and stops ransomware, and cryptojacking attacks in real-time. Defends Windows, Mac, networks shares and NAS devices – as well as backup files, the software, and backup agent. Automatically restores affected files.	Not supported	Not supported	Not supported	Integrated into some editions
Real-time Antimalware Protection	Integrated into Advanced and Premium licenses. Detects and stops all malware in real-time, including never-before-seen zero-day threats.	Not applicable	Not supported	Not supported	Integrated into some editions
On-demand Antivirus Scan	Integrated into Advanced and Premium licenses. Both full system and quick scans. Can run simultaneously with backups to prevent reinfection during restores.	Not applicable	Not supported	Not supported	Integrated into all editions
Vulnerability Assessment	Integrated into all licenses. Identifies security weaknesses in the operating system and the most commonly used apps.	Not applicable	Not supported	Not supported	Integrated into some editions
Web Filtering	Integrated into Advanced and Premium licenses (Windows only). Blocks websites with malware, scams, and phishing attacks.	Not applicable	Not supported	Not supported	Integrated into some editions
Videoconference Protection	Integrated into all Windows licenses. Protects Zoom, Cisco WebEx, Microsoft Teams meetings from cyberattacks.	Not applicable	Not supported	Not supported	Not supported
All-in-one Recovery Tool	Places everything needed for system recovery — including boot media, system partitions and all backups — on a single external USB hard disk drive.	Not applicable	Not supported	Not supported	Not supported
